

PREM Group chooses cutting-edge solutions to enhance its guests' experience in Amsterdam

PREM Group has been a partner of Nonius since 2014 and recently selected its [TV and Internet solutions for their newly opened luxury serviced apartments PREMIER SUITES PLUS Amsterdam](#).

[PREM Group](#) is an International hotel and hospitality management company operating multiple businesses across Europe. It partners with prestigious hotel groups and brands like [InterContinental Hotels Group](#) and [Accor](#) as well as managing PREM Group's brands, [Leopold Hotels](#) and [PREMIER SUITES](#).

The latter is a set of luxury serviced apartments that offers an alternative for those looking for a luxury stay, but with more autonomy than what they would find in a hotel. These properties offer their guests a range of technological services that contribute to a greater experience, both for short and long stays.

[PREMIER SUITES PLUS Amsterdam](#) invested in a robust TV solution to provide a wide range of TV channels in the property and chose our solutions to provide Internet and Cast services to their guests.

Cost-effective and high-quality TV solutions

The amazing Amsterdam serviced apartments invested in cutting edge technology to offer a good TV experience and better sources of information for their guests.

The project included the installation of [Samsung Hospitality TVs](#), the provision of TV channels and the implementation of [DVB-S to DVB-T headend](#), to offer TV content in all rooms, through the distribution of TV signals over the existing coaxial cable infrastructure.

- 193 TV sets were installed
- [Nonius DVB-S and DVB-T headend](#)
- [HD TV Channels](#) in partnership with [Joyne](#)

The content and settings of the Samsung Hospitality TVs are centrally managed from [Samsung LYNK REACH](#).

Seamless Chromecast solution

Thanks to the [Cast solution](#), the luxury serviced apartments offer a rich entertainment option for their guests, allowing easy connection from their mobile devices to stream their own content on the TV.

Managed Networks specialized support

We have a [24/7 in-house specialised NOC \(Network Operation Center\)](#) providing technical support and proactive maintenance to the property's networks. Our [analytics and dashboards](#) provide greater capacity to monitor and react quickly.

Tom Vermerris
General Manager at
PREMIER SUITES PLUS
Amsterdam

"More like a partner than a supplier. While offering products of the highest standards is their service and expertise that sets them apart. Should there be an issue or enquiry about a possible solution, their 24/7 support and our main contacts have proven to be very sufficient in finding a quick solution that often outreaches our expectations.

Nonius has been a trustworthy partner which made it an easy choice to work with them in our newest property. While opening PREMIER SUITES PLUS Amsterdam, Nonius offered solid advise in overcoming challenges which led to a great part of the experience that we are proud of to offer our guests."

"We are honored to serve PREMIER SUITES PLUS Amsterdam with our technology. The satellite TV channels are distributed via coax by the Nonius in-house developed headend. Guests can also watch their favorite content via the secure and awarded Nonius cast solution that works on any TV.

We would like to express our gratitude to all the hotel staff for the cooperation that allowed us to work during the Covid-19 pandemic, in the safest possible way."

Arthur Maes
Nonius Managing Director
for Benelux
